

Interactions

We humans talk
mostly with words
sometimes it helps
sometimes it hurts.

With animals
we may do the same
it's easier though
they need no fame.

And we may talk
to plants and flowers
for seconds, minutes,
or even hours.

All in all
we all interact
and hopefully
we learn to respect
that everything
on earth has its place
it takes its time
it takes its space ...
the rose, the ant,
the cauliflower, the dove,
everything between earth
and the skies above,
has a meaning
and was made in love.
